

I respectfully urge the FCC to reject the NAB's petition 04-160. I pay for XM radio services specifically because I do not care for the limited content that is provided by broadcast radio. If they did a better job with their own stations, there would not be a market for satellite radio. There is no reason for the NAB to be able to control what I can and cannot listen to on XM radio. The addition of the Traffic and Weather channels to the XM lineup is useful and is something that was needed to complete the package of offerings on XM.

Please do not allow the NAB and their lobbyists this opportunity to unfairly inhibit XM's ability to compete.

Sincerely,
Lori Landis
